NEW YORK STATE TEACHER CERTIFICATION EXAMINATIONS™

FIELDS 107/108: (SEPT 2013) SCHOOL BUILDING LEADER ASSESSMENT DESIGN

This assessment consists of two parts, administered as two separate tests. In order to pass the overall assessment, candidates are required to achieve a score that meets or exceeds a separate performance standard for each part. Each part consists of selected-response items and three performance tasks. In Part One, the greatest emphasis is on instructional leadership. In Part Two, the greatest emphasis is on human capital management.

Part One includes one extended performance task that requires candidates to read a school-based scenario and analyze student performance data, formative assessment data, student and teacher survey results, and teacher evaluation and observation data. Candidates are asked to use the information provided to respond to a series of prompts, identifying strengths and areas of need in the school's instructional program and outlining and supporting strategies for building on the program's strengths and addressing areas of need. Part One also includes two shorter performance tasks, each of which presents a scenario and data describing an authentic situation involving a school's culture or learning environment, or an equity concern in a school. Candidates are required to use the information to respond to prompts, exploring the situation and explaining strategies for addressing important issues related to the situation.

Part Two includes two extended performance tasks. The first task requires candidates to analyze and evaluate a teacher's video-recorded classroom performance using a state-approved rubric for annual professional performance review. Candidates are required to identify evidence from the video relating to each component, determine a level of performance for each rubric component, and identify a teacher strength and area of need, citing observable evidence as support. The second task requires candidates to analyze teacher evaluation data, as well as other types of authentic evidence related to human capital development (e.g., teacher observation data, teacher survey data, state assessment results). Candidates are asked to use the information provided to respond to four short assignments involving short- and long-term human capital development, as well as actions to promote the development of specific teachers. Part Two also includes one shorter performance task that presents a scenario and data describing an authentic situation involving either family engagement in a school or school interactions with a community organization (e.g., business, institution of higher education). Candidates are required to use this information to respond to prompts, exploring the situation and explaining strategies for addressing important issues related to the situation.

Both Part One and Part Two include selected-response item sets. Each set requires candidates to read a school-based scenario and analyze several pieces of authentic evidence relevant to the competency being assessed in order to answer four or five selected-response items. In addition, Part Two includes discrete selected-response items.

DRAFT August 2013
Authorized for Distribution by the New York State Education Department

As indicated in the tables that follow, for Part One, the selected-response items count for 40% of the total test score and the performance tasks count for 60% of the total test score. For Part Two, the selected-response items count for 25% of the total test score and the performance tasks count for 75% of the total test score. Within each part, each selected-response item counts the same toward the total test score for that part. The percentage of the total test score derived from each performance task is also indicated in the tables that follow.

Achievement of School Goals

The New York State School Building Leader has the knowledge and skills necessary to lead stakeholders in developing and implementing a shared vision and goals focused on high levels of student learning and achievement. The building leader knows how to use student achievement data and other evidence to identify vision-aligned goals and to develop, implement, and monitor plans to achieve goals. The building leader has a deep and comprehensive knowledge of research-supported practices for curriculum, instruction, and assessment and knows how to develop and sustain a rigorous, standards-based, data-driven educational program that encourages and enables all students to be successful learners and all teachers to perform at a high level. The building leader is able to develop and enhance an organizational culture of academic excellence, exemplary behavior, and equity that is responsive to all types of student diversity and that promotes students' and educators' accountability for their own performance and outcomes.

To promote the success of every student, the New York State School Building Leader has the knowledge and skills necessary for developing a skilled and dedicated school staff through effective hiring, evaluation, supervision, and professional development opportunities matched to staff needs. The building leader is able to promote a professional learning community of teachers, administrators, and other staff committed to achieving the school vision and goals through ongoing collaboration, professional growth, planning, sharing, and problem solving. The building leader knows how to build positive, productive relationships with families, the business community, institutions of higher education, nonprofit organizations, and other members of the community and gain their active involvement and support in developing and sustaining a strong school program. The building leader understands and adheres to legal and ethical guidelines relevant to school leadership and knows how to implement organizational, fiscal, and operational management systems and practices that support achievement of school goals for teaching and learning.

As used in this document, the term "research-based" refers to those practices that have been shown to be effective in improving learner outcomes through systematic observation or experiment, rigorous data analysis, ability to replicate results, and publication in a peer-reviewed journal. "Evidence-based" refers to strategies empirically shown to improve learner outcomes, though not necessarily based on systematic experiments or published in a peer-reviewed journal.
